

SURESH M

Full Stack Developer | React.js | MySQL | GraphQL | Node.js | TypeScript

+91 7845841607 | m.suresh4405@gmail.com | Chennai, Tamil Nadu

sureshcodes.vercel.app | github.com/Suresh4405 | linkedin.com/in/sureshm2002

Professional Summary

Full Stack Developer experience in designing, developing, and maintaining end-to-end application features across frontend and backend using React.js, MySQL, and GraphQL. Strong proficiency in JavaScript and TypeScript with hands-on experience in component design, state management, and building responsive, reusable, high-performance user interfaces. Skilled in relational database design, query optimization, and modeling complex data relationships for performance and scalability, with hands-on use of Sequelize ORM for schema and migration management. Experienced in integrating frontend applications with REST and GraphQL APIs, API security (JWT, OAuth 2.0, RBAC), and performance optimization, having reduced API response time by 68% and achieved 95+ Lighthouse scores. Comfortable taking ownership of assigned modules from design through deployment, collaborating with cross-functional teams, and contributing to code reviews and engineering best practices.

Technical Skills

Frontend: React.js (Hooks, Component Design, State Management), Next.js, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, Material-UI, HTML5, CSS3, Web Performance Optimization, SEO

Backend: Node.js, Express.js, GraphQL (API Integration, Query Consumption), REST APIs, JWT Authentication, OAuth 2.0, RBAC, API Security, Socket.IO, Server-Side Rendering (SSR)

Database: MySQL, Sequelize ORM, Relational Database Design, Query Optimization, Database Indexing, Data Modeling, MongoDB, SQL Server, Redis Caching

Cloud & DevOps: AWS EC2, AWS S3, Docker, Containerization, GitHub Actions, CI/CD Pipelines, Vercel, Automated Deployment, Scalability

Engineering Practices: Code Reviews, Clean Code, Unit Testing, Git, Collaborative Development Workflows, Agile, Jira, Cross-Functional Collaboration

Testing & Tools: Jest, React Testing Library, Playwright, Postman, Git, GitHub, Jira, Performance Monitoring

Work Experience

Web Developer

July 2024 – August 2025

e-con Systems India Private Limited | Chennai

- Developed enterprise React.js and Next.js applications, achieving 95+ Lighthouse scores through lazy loading, code splitting, and image optimization.
- Designed and optimized MySQL queries and database indexes, modeling complex relational data structures and reducing API response time by 68% using Redis caching, handling 4,000+ daily requests with 90% uptime.
- Implemented Sequelize ORM models, associations, and migrations for MySQL schema management, streamlining the data access layer across backend modules.
- Integrated frontend applications with REST and GraphQL APIs, consuming GraphQL queries to support efficient, high-performance data fetching for enterprise UI components.
- Built secure REST APIs with JWT, OAuth 2.0, and RBAC, supporting 500+ concurrent users.
- Improved organic traffic by 47% through collaboration with design and QA teams to ship and refine features.

Freelance Full Stack Developer

December 2024 – Present

Self-Employed | Remote

- Built a full-stack web application using React.js, Node.js, MongoDB for a freelance client.
- Built a reusable React component library to streamline development for the project.
- Configured CI/CD pipeline with GitHub Actions, deploying frontend on Vercel and backend on AWS EC2.

Web Development Intern

June 2022 – July 2022

National Small Industries Corporation (NSIC) | Chennai

- Built responsive dashboard UI components using HTML5, CSS3, JavaScript, and REST API integration.
- Used Git and GitHub for version control and collaborated with team members on development tasks.

Featured Projects

WebSocket Collaboration Studio

React.js | Socket.IO | Node.js | MongoDB | Redis | Docker

A real-time collaborative diagramming platform where multiple users design and edit system architectures simultaneously. Uses React Flow for the diagram engine and drag-and-drop UI, with Socket.IO managing WebSocket connections and room-based synchronization. Supports live cursor tracking, JWT authentication, and project persistence in MongoDB Atlas.

Live: sureshcodes.vercel.app/suresh-colab

Micro-frontend Platform

Next.js | React.js | Iframe Integration | Airtable

A platform built with a React container that embeds independent Next.js applications using iframe integration. The container manages shared data through Airtable, supports standalone or embedded execution of modules, and includes an admin dashboard to monitor analytics and user activity across all micro-frontends.

Live: sureshcodes.vercel.app/micro-frontend

TallySync Financial Dashboard

React.js | Node.js | MySQL | Redis | Tally Prime API

Enterprise financial reporting dashboard with optimized MySQL queries, relational data modeling, database indexes, and query analysis for performance and scalability. Implemented Redis caching layer reducing data retrieval time by 65%, responsive analytics UI with real-time updates, and high-performance data rendering for 1,000+ rows, serving accountants and finance professionals.

Live: sureshcodes.vercel.app/tallysync

Developer Portal

React.js | Node.js | SQL Server | AWS S3 | Zoho CRM API

Enterprise developer portal with JWT-based authentication, role-based access control (RBAC), Zoho CRM API integration for lead management, and AWS S3 integration for secure file storage and delivery. Scalable frontend architecture serving enterprise developers with 99.5% uptime and comprehensive API documentation.

Marketing Microsites

React.js | Node.js | Tailwind CSS | SEO Optimization | Performance

Responsive enterprise marketing microsites built with React.js and Node.js, featuring content-focused layouts, SEO optimization, smooth animations, and integrated lead generation forms. Includes ZeroBounce API integration for email validation and spam reduction. Optimized for fast load times, mobile responsiveness, and conversion-focused user journeys.

AI Camera Selector

React.js | Node.js | OpenAI API | Redis | TypeScript

AI-powered camera recommendation engine integrating OpenAI GPT API for intelligent product suggestions. Node.js backend with Redis caching for recommendation persistence and sub-500ms response times, dynamic React.js UI with real-time updates. Optimized for fast, interactive user experience with seamless AI integration.

Education

Bachelor of Technology (B.Tech) – Information Technology

Aug 2019 – May 2023

SRM Valliammai Engineering College, Chennai

CGPA: 8.05 / 10

Certification

Full Stack Development Certification – MERN Stack

Oct 2023 – Apr 2024

Besant Technologies, Chennai

Key Achievements

- Achieved 90+ Lighthouse scores across multiple web applications, reducing page load time by 58% and improving user retention by 32%.
- Reduced API response time by 68% using Redis caching, MySQL query optimization, and Node.js async processing, supporting 1,000+ concurrent users with 99.2% uptime.
- Built reusable React.js component library and CI/CD pipelines, reducing development time by 40% and increasing organic traffic by 47% via SEO optimization.
